

ASHGAN MUSTAFA

Senior Full-Stack Engineer

Kigali, Rwanda (Remote, UTC+2) | ashganwiki@gmail.com | +250 795 606 625 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 9+ years of experience building, deploying, and maintaining production web applications end to end. Skilled in React, Next.js, TypeScript, Node.js, Express, PHP, Laravel, PostgreSQL, Azure, and Google Cloud. Experienced in API development, cloud deployment, payment integrations, conversational AI, CI/CD, and security-sensitive systems. Contributor to Spring ACT's Sophia platform, recognized with the UN Global AI for Good Impact Award 2025, and top contributor and maintainer of its encrypted Digital Safe application. Increasingly leverages AI-assisted development workflows to accelerate delivery without compromising code quality.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, Python, SQL

Frontend: React, Next.js, Vue.js, Nuxt.js, Tailwind CSS, Bootstrap, HTML, CSS

Backend: Node.js, Express.js, Laravel, Strapi CMS, Payload CMS, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, Supabase, Prisma ORM

Cloud & DevOps: Microsoft Azure (Web Apps, Blob Storage, Key Vault), Google Cloud, Docker, GitHub Actions, Git

Security & Integrations: Client-side encryption, JWT, Stripe Embedded Checkout, Conversational AI

AI-Assisted Development: Claude, agentic AI coding tools, prompt engineering, AI-assisted code review

Testing: Vitest, Jest, Cypress, Jasmine

Tools: Postman, Jira, ClickUp, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

[Spring ACT](#) — **Switzerland-Based NGO** — *Remote*

Senior Full-Stack Engineer March 2025 – Present

[Sophia](#) — **Anonymous AI Support Platform** | *Next.js, React, Payload CMS, PostgreSQL, Azure*

- Built the full chat interface from scratch, including streaming message rendering, suggestion prompts, character limits, error handling, and privacy-focused UI components.
- Integrated a production conversational-AI chatbot and led the migration from the previous "Ada" integration to the current provider.
- Delivered an end-to-end Stripe embedded-checkout donations feature independently, including payment-intent and checkout-session APIs, form components, input validation, and CI key configuration.
- Migrated analytics from GA4 to privacy-first Plausible Analytics with appropriate staging and production controls.
- Contributed to a platform recognized with the UN Global AI for Good Impact Award 2025, supporting 42,000+ conversations across 172 countries and 25+ languages.

[Digital Safe](#) — **Encrypted Document Storage Platform** | *React, TypeScript, Node.js, Express, PostgreSQL, Azure*

- Joined an established multi-contributor codebase and became its top contributor, accounting for approximately 35% of more than 1,800 commits.
- Became the de facto maintainer, reviewing and merging more than 100 pull requests.
- Led a full 2026 UI rebuild across the React and TypeScript client and drove a server-side refactor that improved testability and startup reliability.
- Built the project's automated testing suite from the ground up.
- Owned core security flows, including client-side encryption and image-based authentication, ensuring documents were encrypted before transmission to the server.
- Maintained GitHub Actions CI/CD pipelines for live Azure production and staging environments.

- Leveraged AI-assisted development workflows heavily (Claude, agentic coding tools) to accelerate feature delivery across the platform, pairing rapid prototyping with hands-on review and testing to maintain production quality.

[BSS Connects](#) — East African Bilingual Digital Platform Telecom software company specializing in BSS/OSS solutions

System Developer April 2024 – October 2024

- Built an internal operations and administration dashboard from the ground up using React, centralizing operational controls in a single interface.
- Developed the full stack end-to-end and containerized the application with Docker for consistent, reproducible deployments.
- Deployed via Netlify and owned the feature from requirements through production.

Sunut Digital — *Kigali, Rwanda*

Tech Lead November 2024 – March 2025

- Led development of an e-wallet platform for international monetary transactions addressing Sudan's economic constraints.
- Managed agile delivery through Jira, including sprint planning, backlog management, and team coordination.
- Served as the central liaison between mobile, backend, and architecture teams, aligning technical, design, and research efforts.
- Owned the project lifecycle from ideation through deployment using a user-centered, accessibility-first approach.

[Andariya Magazine](#) — East African Bilingual Digital Platform

Full-Stack Developer March 2024 – October 2024

- Integrated Strapi CMS to improve content-management workflows.
- Achieved an 89% improvement in application performance through image optimization, caching, and database query tuning.
- Delivered a redesigned user interface, improved search functionality, and migrated the legacy codebase to the latest version for better maintainability.
- [Nit3allam](#) Educational Platform: Worked as a Front-End Developer for an Odoo-based educational platform that offers e-learning courses. Implemented responsive and user-friendly designs, integrating them with Odoo's backend to provide a seamless user experience across devices.

Omdena — [EquiJob](#) Open-Source AI Project

Full-Stack Developer / Tech Lead September 2023 – December 2023

- Led development of the EquiJob platform using React.
- Built and deployed a custom machine-learning REST API on Google Cloud, integrating AI capabilities into the platform.
- Collaborated with data scientists and designers to define requirements and conducted usability testing to refine the interface.

Freelance / Contract — [Maxnet](#), [SECS](#), and [Mashatta](#) — *Khartoum, Sudan*

Full-Stack Developer January 2020 – March 2023

- Built a client-complaint support portal with case-tracking functionality for Maxnet.
- Designed and developed a website and content-management system for the environmental NGO SECS.
- Built Mashatta, a membership-based blogging platform for Sudanese feminist writers and activists.

[Tenchologya Co.](#) — Digital Services Studio — *Khartoum, Sudan*

Frontend Developer May 2019 – December 2019

- Built and deployed a real-estate mobile application for browsing and showcasing properties.
- Developed an administration dashboard for application data management and analytics.

- Provided technical support, including server configuration and troubleshooting, helping minimize downtime.

EDUCATION

Mathematics and Computer Science 2010 – 2015

Faculty of Mathematical Sciences, University of Khartoum — Sudan
